SK INTERNATIONAL

SEO Dev Handoff

skinternational.us | April 2026

This document contains two things: (1) the master issues summary for the development team, and (2) exact replacement copy for every page's title tag, meta description, H1, H2s, and H3s.

Overall SEO Score	Critical Issues	High Priority	Medium / Low
38 / 100	7	9	11

Part 1 — Master Issues Summary

All issues are listed below in priority order. Severity key: Critical = fix before anything else; High = fix this sprint; Medium/Low = fix in the next 30–60 days.

Issue	Severity	SEO Impact	Exact Dev Fix
Blogs page returns HTTP 409	Critical	Google cannot index the page; crawl budget wasted on error	Investigate and resolve the 409 Conflict at /resources/blogs.php. If deprecated, implement a server-side 301 redirect to /resources/news-and-events.php immediately.
No XML sitemap	Critical	Google must discover all pages by following links only — deep pages may never be indexed	Generate /sitemap.xml listing all canonical page URLs. Exclude 404/redirect pages. Submit to Google Search Console and Bing Webmaster Tools. Auto-regenerate on any publish.
No robots.txt	Critical	Crawlers may waste budget on PDFs, admin paths, and duplicate URLs	Create /robots.txt. Allow all user-agents on indexable content. Disallow /pdf/, /contact-us/thank-you, any admin paths. Add: Sitemap: https://skinternational.us/sitemap.xml
www vs. non-www dual domain	Critical	Both versions resolve — Google sees two homepages, link equity is split, duplicate content penalty risk	Choose one canonical domain (recommend non-www). Add 301 redirect from www to non-www (or vice versa) in .htaccess or server config. Add <link rel='canonical'> to all pages.
Zero structured data / schema markup	Critical	No rich results eligibility — no breadcrumbs in SERPs, no Knowledge Panel, no FAQ results. Competitors with schema win CTR.	Implement JSON-LD schema on: Homepage (Organization + LocalBusiness), all service pages (Service), Contact page (LocalBusiness with NAP), all inner pages (BreadcrumbList). Full JSON-LD code provided in Part 2 of this document.
Title tags not keyword-optimized	Critical	Title tag is the #1 on-page ranking factor. Current tags are generic, too long, and not keyword-led.	Replace title tags on every page using the exact copy provided in Part 2. Format: [Primary Keyword] | [Brand + Location]. Under 60 characters.
.php URLs without canonical control	Critical	Risk of Google indexing multiple URL forms of the same page (with/without .php, trailing slash variants)	Add <link rel='canonical' href='https://skinternational.us/[exact-url]'> to the <head> of every page, pointing to the definitive URL for that page.
Missing meta descriptions on all pages	High	Google auto-generates poor snippets. Custom meta descriptions improve SERP click-through rate by 5–15%.	Write and implement meta descriptions for every page using the exact copy in Part 2. 150–160 chars, include primary keyword and a CTA.
H1 tags generic or missing on service/industry pages	High	H1 is the primary on-page keyword signal. Generic or	Replace H1 on every service and industry page using exact copy in Part 2. One H1 per page. Must include the page's primary keyword.

Issue	Severity	SEO Impact	Exact Dev Fix
		absent H1s waste the most valuable heading position.	
All image alt text missing	**High**	Image search traffic = zero. Also fails WCAG accessibility. Google cannot understand what images depict.	Add alt text to every image sitewide. Exact alt text for all key images is provided in Part 2.
Thin content on service/industry pages	**High**	Google's Helpful Content system penalizes pages under ~300 words. Several industry pages have under 100 words.	Expand each thin page to 400–600 words. Part 2 provides body copy for the thinnest pages. For remaining pages, content team to expand using the keyword and structure guidance provided.
No internal linking in body copy	**High**	Pages are siloed — no PageRank flows between service and industry pages. Deeper pages get no link equity.	Add contextual hyperlinks within body copy per the linking matrix in Part 2. This requires no new content, only adding <a href> to existing text.
Advanced IT Consulting nav link is dead (javascript:;)	**High**	Google cannot crawl a page that doesn't exist. This entire service section is invisible to search engines.	Create a landing page at /services/advanced-it-consulting-services/. Until live, update the nav href to point to the first sub-page: /services/advanced-it-consulting-services/it-staffing-and-consulting.php
No GA4 or Search Console verified	**High**	No way to track organic traffic, rankings, crawl errors, or Core Web Vitals in production.	Install Google Analytics 4 via gtag.js in <head>. Verify property in Google Search Console. Submit sitemap. Configure Core Web Vitals report.
No Open Graph / Twitter Card meta tags	**High**	Pages shared on LinkedIn or social show no image, title, or description — reducing referral traffic.	Add OG and Twitter Card meta tags to all pages. Exact tags per page are in Part 2.
Core Web Vitals concerns (image sizing, duplicate nav HTML)	**High**	LCP, CLS, INP are confirmed Google ranking factors. Mobile-first indexing means mobile performance sets rankings.	1. Add explicit width and height attributes to all <img> tags to prevent CLS. 2. Refactor desktop/mobile nav to one HTML element with CSS show/hide. 3. Add loading='lazy' to all below-fold images. 4. Run PageSpeed Insights on homepage and top 5 service pages; action the results.
Heading hierarchy skips levels (H1 > H3)	**Medium**	Disrupts semantic document structure used by Google to understand page topics.	Audit every page. Ensure flow is H1 → H2 → H3 with no skipped levels. Never use an H3 where an H2 has not appeared above it on the same page.
Testimonials in JS modals — not crawlable	**Medium**	Full testimonial text (containing keywords like GD&T, robot	Render testimonial text in visible HTML on the page. Use a CSS expand/collapse pattern (HTML <details>/<summary>) instead of JS modals.

Issue	Severity	SEO Impact	Exact Dev Fix
		simulation, machining) is invisible to Google.	
NAP not in site footer	Medium	Address and phone number must appear on every page for local SEO signals.	Add to footer of every page: SK International | 46918 Liberty Dr, Wixom, MI 48393 | (248) 621-9608 | sales@skinternational.us
No LocalBusiness schema on Contact page	Medium	Misses local SEO rich result eligibility and Google Maps association.	Add LocalBusiness JSON-LD to the Contact page. Full code is in Part 2 of this document.
Footer copyright outdated (©SK 2023)	Medium	Minor credibility signal; also signals the site may not be actively maintained.	Change footer copyright text from '©SK 2023. All Rights Reserved.' to '© 2026 SK International. All Rights Reserved.'
PDF files linked in footer without noindex	Medium	PDFs consume crawl budget and may surface incorrectly in SERPs.	Add the HTTP response header X-Robots-Tag: noindex to all PDF files served from /pdf/. Alternatively, add ?noindex to the link href and handle via .htaccess.
Mobile nav is a full duplicate HTML block	Medium	Navigation is rendered twice in the DOM — doubles link signals and adds unnecessary page weight.	Consolidate to one <nav> element. Use CSS classes (e.g., d-none d-md-block) to control desktop vs mobile visibility. Remove the duplicate rendered nav block.
No Google Maps embed on Contact page	Medium	Strengthens local SEO and improves UX for buyers trying to locate the facility.	Embed a Google Maps iframe on the Contact page pointing to 46918 Liberty Dr, Wixom, MI 48393.
Keyword cannibalization across service pages	Medium	Multiple pages competing for the same queries split ranking signals.	Each page in Part 2 has been assigned one unique primary keyword. Ensure no two pages share the same primary keyword target. See the keyword map column in Part 2.
No author bylines or team credentials on any content	Low	E-E-A-T (Experience, Expertise, Authority, Trust) signals are missing. Hurts rankings for competitive queries.	Add author name and title to all blog/news articles. Add a team/leadership page with names, titles, and LinkedIn links.
Client logos have no alt text	Low	Strong trust signals (Samsung, Nissan, Magna, DuPont) are invisible to search engines.	Add alt text to all client logo images: alt='[Company name] logo — SK International customer'

Part 2 — Exact Replacement Copy, Per Page

For every page listed below, replace the current title tag, meta description, H1, H2s, and H3s with the exact text shown in the green column. Where body copy additions are needed, the new paragraphs are provided directly below the table.

Format reminder:

- Title tag goes in <head>: <title>COPY HERE</title>
- Meta description goes in <head>: <meta name="description" content="COPY HERE">
- H1 replaces the existing top heading on the page: <h1>COPY HERE</h1>
- H2/H3 replace existing section headings in order from top to bottom of the page

Page 1 — Homepage

Page 2 — Engineering Services Overview

URL: https://skinternational.us/services/engineering-services.php

Primary keyword target: engineering design services automotive Michigan

Current title tag (what Google sees): Leading Solutions Provider: Engineering, Customized Design and Engineering, Manufacturing, Automation, Civil Engineering, Factory Automation.

Field	Current (what Google sees now)	Replace with this exact copy
Title Tag	*Leading Solutions Provider: Engineering, Customized Design and Engineering, Manufacturing, Automation, Civil Engineering, Factory Automation.*	**Engineering Design Services | SPM, Automation & Simulation | SK International**
Meta Description	*Not set*	**SK International provides precision engineering design services including SPM design, BIW line engineering, robot simulation, FEA, and automation production line design. Serving automotive, aerospace, and industrial clients across North America.**
H1	*Engineering Services (navigation label used as page heading)*	**Engineering Design Services for Automotive & Industrial Manufacturing**
H2 — Service list intro	*No H2 confirmed*	**What We Deliver**
H2 — Industries served	*No H2 confirmed*	**Industries We Serve**
H2 — CTA section	*No H2 confirmed*	**Start Your Engineering Project**

Body copy addition (add after H1, before the service list). Min 2 paragraphs:

With over 20 years of experience, SK International delivers precision engineering design solutions tailored for high-volume and low-volume manufacturing environments. Our engineering team works across the full product lifecycle — from initial concept and simulation through to production-ready design packages.

Whether you need a Special Purpose Machine for an engine line, a Body-in-White welding cell, or a complete factory throughput simulation, our engineers bring deep automotive and industrial expertise to every project. We operate from our facility in Wixom, Michigan, and serve clients across North America.

Page 3 — Design of Special Purpose Machines (SPMs)

URL: https://skinternational.us/services/engineering-services/design-of-spm.php

URL: https://skinternational.us/services/engineering-services/transmission-lines.php
Primary keyword target: BIW body in white engineering services
Current title tag: Not confirmed — likely generic nav label

Field	Current (what Google sees now)	Replace with this exact copy
Title Tag	*Transmission Lines, Body-in-White (BIW) Lines — likely generic*	BIW & Transmission Line Engineering Services | SK International
Meta Description	*Not set*	SK International engineers Body-in-White (BIW) and transmission line systems for automotive OEMs and Tier 1 suppliers. From concept design to production-ready engineering packages — delivered from Wixom, Michigan.
H1	*Transmission Lines, Body - in - White (BIW) Lines*	Body-in-White (BIW) & Transmission Line Engineering
H2	*No H2 confirmed*	Engineering Capabilities
H2	*No H2 confirmed*	Applications & Industries Served

Page 5 — Robot Simulation & Factory Throughput Simulation

URL: https://skinternational.us/services/engineering-services/robot-simulation.php
Primary keyword target: robot simulation services automotive manufacturing
Current title tag (Google sees): A peak into SK International's work with Robot Simulation & Factory Throughput Simulation.

Field	Current (what Google sees now)	Replace with this exact copy
Title Tag	*A peak into SK International's work with Robot Simulation & Factory Throughput Simulation.*	Robot Simulation & Factory Throughput Simulation Services | SK International
Meta Description	*Not set*	SK International provides robot simulation and factory throughput simulation services for automotive manufacturing. Optimize cycle time, validate line layouts, and eliminate production bottlenecks before build. Based in Michigan.
H1	*Robot Simulation, Factory Throughput Simulation (navigation label)*	Robot Simulation & Factory Throughput Simulation Services
H2 — overview	*No H2 confirmed*	What Is Robot Simulation?
H2 — capabilities	*No H2 confirmed*	Our Simulation Capabilities
H2 — outcomes	*No H2 confirmed*	Simulation Results: What Our Clients Achieve

Body copy addition (page is confirmed thin — add after H1):

SK International is a leading provider of robot simulation and factory throughput simulation services for the automotive industry. Using industry-standard simulation tools, our engineers model complete production lines, validate robot reachability, identify throughput bottlenecks, and optimize cycle times — all before a single piece of steel is cut.

Factory simulation reduces costly engineering changes during build and gives manufacturers the confidence to commit to line layouts with accurate, data-backed throughput projections. Our simulation work has supported engine line, transmission line, and BIW projects for automotive OEMs and Tier 1 suppliers across North America.

Page 6 — General Automation Production Line Design

URL: https://skinternational.us/services/engineering-services/general-automation-production.php
Primary keyword target: automation production line design engineering
Current title tag: Not confirmed — likely generic nav label

Field	Current (what Google sees now)	Replace with this exact copy
Title Tag	*General Automation Production Line Design — likely generic*	**Automation Production Line Design Services | SK International Michigan**
Meta Description	*Not set*	**SK International designs custom automation production lines for industrial and automotive manufacturers. End-to-end engineering from concept through production-ready documentation. Serving OEMs and Tier 1 suppliers across North America.**
H1	*General Automation Production Line Design*	**Automation Production Line Design & Engineering Services**
H2	*No H2 confirmed*	**Our Automation Engineering Approach**
H2	*No H2 confirmed*	**Industries & Applications**

Page 7 — Creating 2D/3D Design Components

URL: https://skinternational.us/services/engineering-services/creating-2d-3d-design-components.php
Primary keyword target: 2D 3D CAD design engineering services
Current title tag: Not confirmed — likely generic nav label

Field	Current (what Google sees now)	Replace with this exact copy
Title Tag	*Creating 2D/3D Design Components — likely generic*	**2D & 3D CAD Design Services for Industrial Manufacturing | SK International**
Meta Description	*Not set*	**SK International creates precision 2D drafting and 3D CAD models for industrial, automotive, and aerospace components. GD&T compliant, production-ready design packages delivered by our Michigan engineering team.**

Page 21 — Aerospace Industry

URL: https://skinternational.us/industries/aerospace.php

Primary keyword target: aerospace manufacturing engineering services

Current title tag (Google sees): SK International offers a range of services encompassing high-precision design, manufacturing, fabrication, assembly, and material handling, with a specific focus on serving the aerospace industry.

Field	Current (what Google sees now)	Replace with this exact copy
Title Tag	*SK International offers a range of services encompassing high-precision design, manufacturing, fabrication, assembly, and material handling, with a specific focus on serving the aerospace industry.*	Aerospace Manufacturing & Engineering Services | Jigs, Fixtures & Tooling | SK International
Meta Description	*Not set*	SK International provides high-precision aerospace manufacturing services including jigs, fixtures, tooling, mass manufacturing, and turnkey engineering solutions. Serving aerospace manufacturers across North America from Wixom, Michigan.
H1	*Not confirmed*	Aerospace Manufacturing & Engineering Services
H2	*No H2 confirmed*	Aerospace Capabilities: Design, Manufacturing & Tooling
H2	*No H2 confirmed*	Why Aerospace Manufacturers Choose SK International

Body copy addition (page confirmed thin — add after H1):

SK International provides high-precision engineering and manufacturing services tailored to the demanding requirements of the aerospace industry. Our capabilities span the full range of aerospace production needs — from precision component machining and jig & fixture design to turnkey assembly solutions and mass manufacturing support.

We bring the same engineering rigor that has made us a trusted partner for automotive OEMs to every aerospace project we undertake. With GD&T-compliant design, tight tolerance machining, and an experienced team based in Wixom, Michigan, we are positioned to support both domestic and international aerospace manufacturers.

Page 22 — Industrial Industry

URL: https://skinternational.us/industries/industrial.php

Primary keyword target: industrial engineering manufacturing services Michigan

Current title tag (Google sees): SK International: Tailored Industrial Solutions.

Title Tag	*SK International: Tailored Industrial Solutions.*	Industrial Engineering & Manufacturing Services | SK International Michigan
Meta Description	*Not set*	SK International provides tailored engineering and manufacturing solutions for the industrial sector. From custom machine design and precision fabrication to

Field	Current (what Google sees now)	Replace with this exact copy
		automation integration — built for the demands of modern industrial production.
H1	*Not confirmed — page confirmed very thin*	Industrial Engineering & Manufacturing Solutions
H2	*No H2 confirmed*	Our Industrial Capabilities
H2	*No H2 confirmed*	Industries & Applications
H2	*No H2 confirmed*	Let's Discuss Your Project

Body copy addition (this page is confirmed as one of the thinnest on the site):

SK International delivers engineering and manufacturing solutions built for the complexity of modern industrial operations. Whether you need custom machine design, precision component manufacturing, or a fully integrated automation cell, our team brings the technical depth and project management experience to deliver on time and to specification.

We have supported industrial clients across welding, assembly, material handling, and process automation applications. Our facility in Wixom, Michigan is equipped to handle everything from single prototype components to production runs — with the same quality standards and engineering rigor we bring to our automotive and aerospace work.

Page 23 — Mining Industry

URL: https://skinternational.us/industries/mining.php
Primary keyword target: mining engineering manufacturing services
Current title tag (Google sees): SK International, a leader in delivering mining engineering services.

Field	Current (what Google sees now)	Replace with this exact copy
Title Tag	*SK International, a leader in delivering mining engineering services.*	Mining Engineering & Manufacturing Services | SK International
Meta Description	*Not set*	SK International provides engineering, manufacturing, fabrication, and automation solutions for the mining sector. Precision detailing, welding operation enhancements, and semi-automated stations for mining OEMs and operators worldwide.
H1	*Not confirmed*	Mining Engineering, Manufacturing & Fabrication Services
H2	*No H2 confirmed*	Our Mining Sector Capabilities
H2	*No H2 confirmed*	What Sets SK International Apart in Mining

Page 24 — Material Handling Industry

URL: https://skinternational.us/industries/material-handling.php
Primary keyword target: material handling engineering solutions pallets conveyors
Current title tag (Google sees): SK International excels in material handling, crafting innovative solutions for pallets, carts, and conveyors.

Title tag is descriptive but needs keyword structure improvement. Meta description missing.

Field	Current (what Google sees now)	Replace with this exact copy
Title Tag	*SK International excels in material handling, crafting innovative solutions for pallets, carts, and conveyors.*	Material Handling Engineering Solutions | Pallets, Carts & Conveyors | SK International

Field	Current (what Google sees now)	Replace with this exact copy
Meta Description	*Not set*	SK International designs and manufactures custom material handling solutions including pallets, carts, conveyors, and automated material flow systems for industrial and automotive facilities. Michigan-based engineering team.
H1	*Not confirmed*	Material Handling Engineering & Manufacturing Solutions
H2	*No H2 confirmed*	Custom Material Handling Design Capabilities
H2	*No H2 confirmed*	Industries & Applications

Page 25 — About Us

URL: https://skinternational.us/resources/about-us.php

Primary keyword target: SK International engineering company Michigan

Current title tag (Google sees): SK International: Your Partner for Engineering Solutions.

Field	Current (what Google sees now)	Replace with this exact copy
Title Tag	*SK International: Your Partner for Engineering Solutions.*	About SK International | 20-Year Engineering & Manufacturing Company | Wixom, MI
Meta Description	*Not set*	Learn about SK International — a 20-year engineering and manufacturing company based in Wixom, Michigan. 600+ projects delivered. Serving automotive, aerospace, industrial, and mining sectors across North America and globally.
H1	*Not confirmed — likely 'About SK International' or similar*	About SK International: Engineering Excellence Since 2005
H2	*Who We Are? (confirmed in snippet)*	Who We Are
H2	*No H2 confirmed*	Our Engineering & Manufacturing Capabilities
H2	*No H2 confirmed*	Industries We Serve
H2	*No H2 confirmed*	Awards & Recognition

Page 26 — Contact Us / Request a Quote

URL: https://skinternational.us/contact-us/request-a-quote.php

Primary keyword target: engineering manufacturing company contact Wixom Michigan

Current title tag (Google sees): Leading Solutions Provider: Engineering, Customized Design and Engineering, Manufacturing, Automation, Civil Engineering, Factory Automation.

Note: The Contact page appears to share the same title tag as the homepage — a critical duplication issue.

Field	Current (what Google sees now)	Replace with this exact copy
Title Tag	*Leading Solutions Provider: Engineering, Customized Design... (same as homepage — DUPLICATE)*	Contact SK International | Request a Quote | Wixom, MI
Meta Description	*Not set*	Contact SK International to discuss your engineering or manufacturing project. Request a free quote, reach our team at (248) 621-9608, or visit us at 46918 Liberty Dr, Wixom, MI 48393. Office hours: Mon–Fri, 7AM–3:30PM.

Field	Current (what Google sees now)	Replace with this exact copy
H1	*Not confirmed — likely 'Contact Us' or 'Request a Quote'*	**Request a Quote or Get in Touch**
H2	*No H2 confirmed*	**Our Contact Information**
H2	*No H2 confirmed*	**Send Us a Message**

Part 3 — Image Alt Text Replacements

Replace all alt attributes on the following key images sitewide. The current state is either alt='' or the filename is used as alt text (e.g., alt='robotic-arms').

Image File / Location	Current alt text	Replace with this alt text
/images/home/car-body-structure.webp	*car-body-structure*	**Automotive car body structure on a manufacturing assembly line**
/images/home/robotic-arms.webp	*robotic-arms*	**Industrial robotic arms in an automotive manufacturing facility**
/images/home/engineers.webp	*engineers*	**SK International engineers reviewing technical drawings on a production floor**
/images/home/robotic-assembly-line.webp	*robotic-assembly-line*	**Robotic assembly line for automated manufacturing production**
/images/home/tower.webp	*tower*	**Industrial engineering tower structure — SK International project**
/images/home/flight-engine.webp	*flight-engine*	**Aerospace flight engine component — SK International engineering services**
/images/home/laser-cutting.webp	*laser-cutting*	**Precision laser cutting manufacturing process — SK International**
/images/home/civil-eng.webp	*Civil Engineering*	**Civil engineering structural design project — SK International**
/images/home/3d-modelling-design.webp	*3d-modelling-design*	**3D CAD modelling and engineering design — SK International services**
/images/sk-international-logo.svg	*sk-international-logo*	**SK International logo — Engineering, Design & Manufacturing Company**
/images/home/clients/samsung-logo.webp	*samsung-logo*	**Samsung logo — SK International customer**
/images/home/clients/hirata-logo.webp	*hirata-logo*	**Hirata Corporation logo — SK International customer**
/images/home/clients/nissan-logo.webp (testimonials)	*Testimonial four logo*	**Nissan logo — SK International customer**
/images/home/clients/magna-logo.webp	*magna-logo*	**Magna International logo — SK International customer**
/images/home/clients/dupont-logo.webp	*dupont-logo*	**DuPont logo — SK International customer**
/images/home/clients/comau-logo.webp	*comau-logo*	**Comau logo — SK International customer**
/images/home/clients/assa-abloy-logo.webp	*assa-abloy-logo*	**ASSA ABLOY logo — SK International customer**
/images/home/clients/martinrea-logo.webp	*martinrea-logo*	**Martinrea International logo — SK International customer**
/images/home/clients/redviking-logo.webp	*redviking-logo*	**RedViking logo — SK International customer**
/images/home/clients/detroit-chassis-logo.webp	*detroit-chassis-logo*	**Detroit Chassis logo — SK International customer**
/images/testimonials_icon/detroit.png	*DETROIT CHASSIS*	**Detroit Chassis LLC logo — SK International testimonial**

Image File / Location	Current alt text	Replace with this alt text
/images/testimonials_icon/hirata-logo.webp	*HIRATA*	**Hirata Corporation of America logo — SK International testimonial**
/images/testimonials_icon/delta-logo.webp	*DELTA SIGMA*	**Delta Sigma Company logo — SK International testimonial**
/images/testimonials_icon/ns-logo.webp	*NEW STANDARD CORP*	**New Standard Corp logo — SK International testimonial**
/images/home/vector-icon1.webp	*vector-icon1*	**19 years of engineering expertise icon**
/images/home/vector-icon2.webp	*vector-icon2*	**600+ completed engineering projects icon**
/images/home/vector-icon3.webp	*vector-icon3*	**50+ clients served icon**
/images/home/vector-icon4.webp	*vector-icon4*	**15 engineering excellence awards icon**

Part 4 — Internal Linking Matrix

Add these contextual hyperlinks inside existing body copy on each page. No new content needed — only add <a href> tags to the underlined anchor text phrases already on or near the page. These are the minimum required links to start building topical authority and PageRank flow.
